

► AccuFill® Indexing Bulking Systems

Description

AccuFill® indexing bulking systems from Gainco are proven to deliver automation of bulk packing applications that are so effective, most have six-month or shorter payback periods. They are truly a “no brainer” when deciding where to spend your capital dollars.

AccuFill® indexing bulking capabilities encompass the full range of fresh or frozen processing applications, making these systems your best choice for automated bulk packing needs. They deliver efficient bulk packing of 22 lb., 40 lb., 70 lb. and 33 lb. export box, tub or other container systems.

When you install an AccuFill® indexing bulking system, you get far more than just the standard packing functionalities. You also get increased throughput, reduced product giveaway, and significant labor savings.

Advantages and Benefits

- High return on investment
- Labor savings – at least one operator per shift for most applications
- Higher volumes achieved than with manual labor alone ... up to 980 lbs./min. throughput capacity
- Up to 14 cycles per minute with dual system
- In-line hopper and conveyor configuration reduce footprint and floor space requirements
- Hygienic open-frame design improves effectiveness of washdown procedures
- 22 lb., 40 lb., 70 lb. and 33 lb. export box, tub or other container systems are available
- Maintenance-friendly ... easy accessibility for service

Features

- Smaller footprint
- AMI sanitary design
- Design flexibility, with multiple configurations available:
 - Single and dual systems
 - With or without diverters
 - Knuckle chain conveyors with pop-up gates or flighted belt conveyors
- Fully integrates with optional proprietary data management software program
