

► Yield Tracking System for Automated Deboning Lines

You've spent millions building your automated deboning line. Make sure you're optimizing your throughput and getting the maximum return on your investment. Our Yield Tracking System helps you do just that.

The **Yield Tracking System** from Gainco is the ideal complement to an automated deboning system. It provides real-time measurement of product yield and utilization, so you can *accurately track the performance* of your automated deboning line and make improvements where needed.

How It Works

Thanks to the ingenious-yet-practical design of our system, you'll accurately determine what's really happening with throughput – including knowing whether product is loaded for optimal throughput and efficiency.

For optimal performance, use Gainco yield tracking weigh hoppers on the front and back end of your automated deboning line, as well as in between where one deboning function "hands off" to another. Our proven hopper equipment and counters plus integrated *B&R*® software control platform give you everything you need.

Advantages and Benefits

- Provides accurate real-time measurement of automated deboning line yield and utilization
- Captures real-time deboning equipment product carrier/shackle loading/utilization data
- Provides leading indicators of line performance so you can react quickly to problems
- Drives better throughput
- Highly attractive return on investment

Features

- Gainco's field-proven rugged weigh hopper and product counting equipment – 30+ years of manufacturing excellence
- *B&R*® integrated software control platform – the industry's most sophisticated and robust package
- Integrates easily into most automated deboning lines (*Foodmate*®, *Mayekawa*®, *Meyn*®, *Stork*®, *others*)
- Maintenance-friendly ... easy accessibility for service

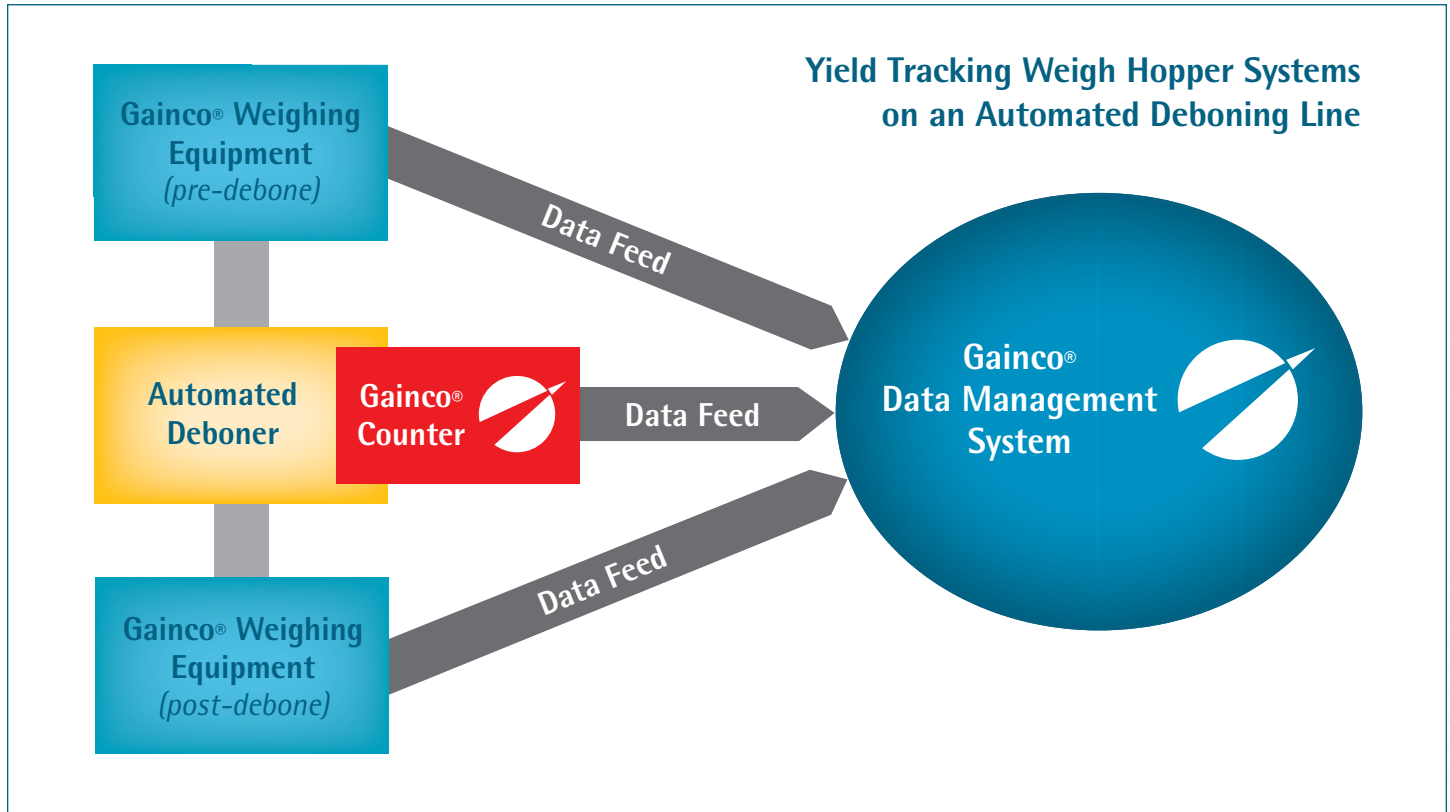

► Seamless Integration

A Gainco Yield Tracking System integrates easily into most new or existing automated deboning lines including **Foodmate**®, **Mayekawa**®, **Meyn**®, **Stork**® and others.

Attractive ROI

And when it comes to return on investment, our system is one that pays for itself many times over. Talk with

our processing specialists to learn how you can take automated deboning line performance and throughput to the very highest level.
